

QUALITY POLICY

Titanium Heat Treatment Services is committed to provide heat treatment services in line with requirements of F1 Teams, their suppliers and other industry sectors. Our 24/7 service is paramount to offer a short, very often overnight service to meet customer's expectations.

We are committed to offer the highest quality and the best customer service to our customers. We will strive to invest in people, their development and working environment to become the company of choice. Only by providing an outstanding service and product quality we will achieve our aims of long term success and sustained improvement.

We will always look into customer's needs and requirements by investing in future technologies to sustain our growth and customers' expectations.

We aim to achieve the above by implementing a quality management system that complies with the international standard ISO 9001. We also commit to monitor the effectiveness of our quality system and to act with integrity to continually improve our operations and to meet the requirements of our customers, as well as our legal and regulatory and any other applicable requirements. We will also monitor and continue to develop our quality system to ensure it remains effective. The scope of our QMS is "The provision of Heat Treatment of ferrous and non-ferrous materials and related consultancy services".

The policy, organization and procedures necessary to achieve the requirements are described in our quality management system. Quality objectives of the Titanium Heat Treatment Services are agreed annually at Management Review meetings and reviewed for effectiveness. At these meetings we ensure that this policy and the quality objectives remain compatible with the strategic direction and the purpose and context of our organization.
